APPLICABILITY

The sports gyroscope (fitness gyroscope) is designed for a comprehensive workout affecting the entire muscle system as well as other soft and joint tissues. The device is driven by human action while the user is fastened in the device in the Vitruvian position. It offers optimal preparation for various sport disciplines, fitness training and body building. The user puts the three rings into motion by own body action. The device is intended for comprehensive training of the muscle, tendon and joint tissues.

Additional equipment

Sideways motion of feet safety grips

Adjustable height of feet safety grips

Standing platform of rubber granulate

Available in many colors

Galvanized frame

Fencing for gyroscope – free standing modules

Reinforced structure – obligatory in case of professional application (soldiers, firefighters, police, high-performance athletes)

Ring size can be adapted to suit customer needs (+/- 500 mm)

Collapsible ring structure (bolt connections)
